

Enough is enough. We have been denouncing for a long time the obstacles to careers, the poor working conditions and the perpetual discrimination of technical cooperation staff, etc. We say "ENOUGH" to this inertia despite the existing dialogue between the Union and the Administration. We say "ENOUGH" to this inertia despite the existing dialogue between the Union and the Administration. Is it not time to move to the next phase with the launch of the movement called TcT (Trop c'est Trop) which will consist of massively transmitting the demands of the staff in the regions who are paying the price of an inaction that can be suspected to be well orchestrated by the Administration?

We demand consideration for technical cooperation staff:

Personal promotions, tenure, merit and other steps.

Contracts and job security

Equalisation of benefits and salaries between RB and TC staff, with equivalent status and seniority.

The administration should take measures to eliminate all forms of precariousness, and move towards greater equality and equal treatment between the different categories of staff (RB-DC, P-G, HQ-Field).

A staff member lost in remote areas
